

WISDOM CIRCLES

I've worked with well over 100 Executive Directors of nonprofits in health, education, social services, the environment and the arts for more than 20 years. I see your commitment, determination and wide-ranging skills. I also see your common challenges and frequent isolation.

I know there are very few resources that provide specific support to community leaders. I also know firsthand the power of small group learning.

It's time for Wisdom Circles.

wiser decisions faster

It is my belief that when our community leaders are strong, our whole community is strong.

These groups are designed to help you:

- Clarify your goals
- Carve out time for strategic thinking
- Learn from diverse perspectives and deep experience
- Find support in solving problems
- Be accountable for your progress
- Provide peer encouragement
- Clear some mind space and refuel for the next leg of your journey

These groups are not:

- Networking opportunities, although you will strengthen your network
- Designed for skills training, although you will build your skills
- Group therapy sessions, although they will be therapeutic!

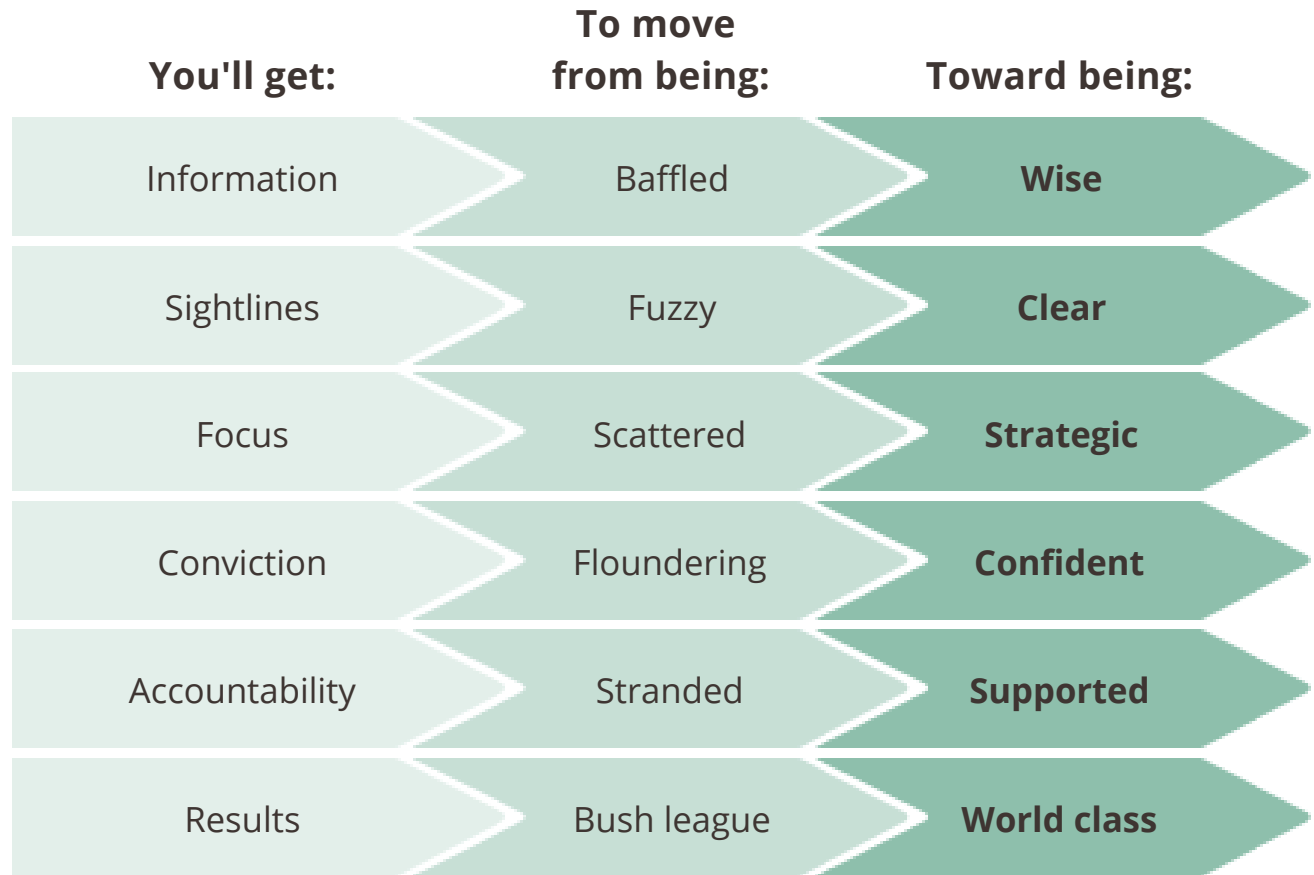

If you are:

- A leader within a community benefit organization
- Eager to up your game
- Ready to invest in your own learning and performance
- Willing to help others do the same
- Prepared to commit the time, discipline and courage required...

**...then Wisdom Circles
are for you.**
